

Theme 1: Contactless Payment

1. What is contactless payment?

It's a form of payment without cash/ without meeting the cashier in person.

Or you don't have to pay in cash when buying something.

2. What forms of payment are now available in vietnam?

in cash, by bankcard (atm, master,visa,...), cheque, voucher, mobile wallet...

3. Do you prefer paying in cash or by bankcard?

I prefer cash for small purchase and by bankcard for big transaction

4. What can you do with your atm card?

I can check information, change the password, and transfer money...

5. What do you often do on your phone?

I often check missed call, message, listen to music, make a call to a friend and go on the FB

Theme 2: Software

1. What software/ applications have you loaded on your mobile phone/ laptop/ PC?

- On my laptop, I have downloaded Word, Excel and Powerpoint..

- On my phone, I have downloaded Youtube, Zalo, FB, Instagram...

2. What app do you most frequently use?

- I often use Word to prepare my assignments or write report

- I use Zalo to keep in touch with my friend, my family

3. What do you often do in order to have the software you need?

- Most of software I have downloaded free

- However, I pay for Kaspersky Anti Virus so that I don't have to worry about virus attacks.

4. Should we pay for an application ? Why?

We should certainly pay for the app we need so that we can have the full version.

Most apps are now being downloaded free, with some restrictions

5. What benefits can an enterprise have if all of their offices upgrade the existing software at the same time?

They can enjoy the good bulk, reductions and save a lot of money from providing some training to the staff.

Beside, the performance and coordination among offices are much better, resulting in high productivity and more profit.

Theme 3: Networking

1. Why is it important for us to be networked in society?

When we are networked, we can update news faster, enrich our knowledge, take advantage of opportunity and improve our life...

2. How can we be networked?

by chatting online, texting, sending a postcard, writing a letter, talking face to face...

3. How often do you access the Internet?

daily to check if I have any email, message, follow my friend on FB, read E-news and search the information I need

4. What benefits can social networking bring to you?

- **I can do some shopping without going to the shop**
- **I can keep in touch with my friend without going out to meet them**
- **I can communicate with my family, my colleges without making a call**

Therefore, I can save a lot of money and time.

5. Which addresses on the UTC website do you often go to? Why?

As a student, I often go to qltd.edu.utc.vn to check my timetable and my score. Sometimes I go to utc.edu.vn to know what is going on at my university.

Theme 4: Computer and Data Security

1. Can you name some ways to protect your data?

We can store it in our laptop, see a strong password and regularly change it.

Or we can store important data in memory sticks and keep it secure

2. What is included in a strong password?

It should include minimum 8 letters (one of which is in uppercase) and 1 or 2 numbers

3. What do you often do to protect your computer/ laptop from viruses?

- I don't let anyone use my laptop

- Also, I buy annual license for Kaspersky Anti Virus to run virus clearing regularly

- For any unknown USB, I would run virus protection scanning before use

4. If there were some bugs on your laptop/ PC, what would you do?

I would run virus detecting and clearing apps

If not effective, I would bring the laptop to an IT expert

5. What risks can there be to download a free program / an app from the Internet and run it on your computer?

I may have a virus infection, malfunction...

Theme 5: IT - based services

1. Can you name some IT - based services?

online shopping, E learning course, online advertising, mobile banking, Internet banking, booking and ticketing...

2. How do you apply Information Technology in your daily life?

I apply IT in many ways: doing my homework (web surfing, designing assignments...); cooking (timing function on the cooker, the microware, the air fryer); doing the washing (selecting a laundry mode...)

3. What website do you often access for your study?

Google Translate...

4. What advantages and disadvantages may online shopping have?

- We can compare and contrast various items of similar type or function. We can order the item and have it shipped to the door

- However, the color or quality of the item we select online may be different from what it looks online. Also, we have to pay for delivery

5. What benefits can E - learning course bring to you?

We can just stay at home to enrich our knowledge. We can manage our time and the learning speed better. We can network many learners from everywhere and share opinions or experiences in our study

Theme 6: Media and Advertising

1. Can you name some forms of advertising available in VietNam?

TV advertising/ commercials, direct mail, leaflets and/ or brochures delivered to your home or given free, billboards (poster), online advertising

2. Of those forms, which one do you think is the most efficient? Why?

TV advertising is possibly the most efficient, especially when broadcast at “golden times” because the advertisements can reach millions of viewers.

3. How have our viewing habits changes compared to those 15 years ago?

We now can watch the programmes whenever we like (not when broadcasters want to transmit them)

4. What would you react if brochures or leaflets of advertisement were dropped at your door?

I would have a quick look at them. If it is something I need, I will place it somewhere for later reference. If not, I throw it away.

5. Should the advertiser pay for his advertisement? Why? Why not?

Advertisers should pay for advertisements so that they can broadcast or hang up somewhere officially and formally. Besides, when advertisements are paid for, they are normally well designed and express the true values
